Let's all be SJWs.

No, not that kind that does virtue signaling in the suburbs..

This starts with *behaving socially.*

Because we don't want to be hypocrites.

What does "behaving socially" mean for a software developer?

Always code as if the guy who ends up maintaining your code will be a violent psychopath who knows where you live.

Or, when you receive criticism or when you learn during code walks that your code base is messed up,

FIX IT!
