

- Congrats! You are Adults.
- RTFM
- B and B2
- C
- Code Walks

I am dead serious.

You are here to learn:

- to grow up
- to learn to design
- to figure out work with others.

**RTFM.**

Deliver.

**B/.**

**B2/. Make. Run.**

# C/ : library is not equal library.

Text is *not* data.

JSON is text, for every PL, including JS.

Your library turns it into your PL's data.

Your library also turns your data into JSON.

# Code Walks:

Why?

What?

How?

And how do you absorb it?

# Code Walks:

Sw Tools do not replace Brains.

What?

How?

And how do you absorb it?

# Code Walks:

Sw Tools do not replace Brains.

To find your mistakes.

How?

And how do you absorb it?

# Code Walks:

Sw Tools do not replace Brains.

To find your mistakes.

2 presenters, 2 readers, 1 secretary.

And how do you absorb it?

Sw Tools do not replace Brains.

To find your mistakes.

2 presenters, 2 readers, 1 secretary.

Embrace when the readers find a flaw, push back as appropriate.

You take apart the code, not the presenter.
